Notes

Event was organised within the context of climate change strategy. Dublin City Council has developed a draft climate change strategy and Codema organised a stand at the conference to disseminate and promote our activities in the ROSH market campaign and to demonstrate its importance in the Climate Change Strategy.

A number of visitors came to the stand prior to the start of the conference and during the day's proceedings and a great interest in the ROSH project was expressed.

The conference was attended by 116 people from local authorities around the country and was opened by Minister John Gormley, Minister for Environment and Local Government.

We believe that the event was very successful in disseminating our activities in the ROSH market campaign.
